

# Final Project Proposal:

## FanHub

### Overview:

1. What is the problem we are trying to solve? Well, I'm a sports fan and every time I try to search a player or a team I have to go to different platforms or websites. Searching for different live scores, predictions, social media, and betting odds across various platforms is actually a bit of a long process sometimes frustrating along the way. FanHub aims to solve this by offering an all-in-one personalized sports experience.
2. Why are we doing this? Simple Just like I want to be up to date on scores, updates, and predictions, but clustered information leads to a poor user experience. This app will consolidate all relevant data in one platform, making it easier for fans to follow what matters most to them.
3. Who is the audience?
  - Primary audience: Sports fans who follow teams and players in multiple leagues.
  - Secondary audience: Fantasy sports players, bettors, and social media enthusiasts.

### List of Major Functions:

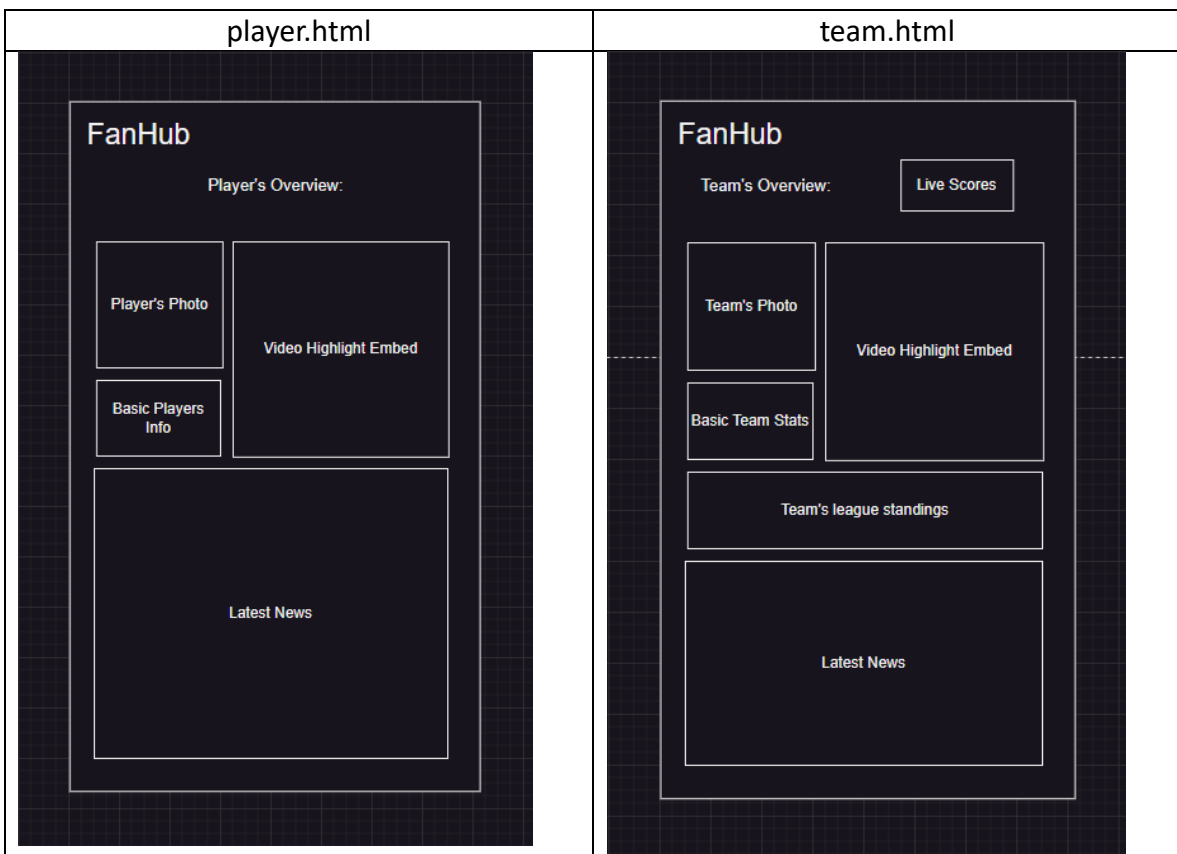

<b>1. User Authentication:</b>	<ul style="list-style-type: none"><li>• Login and registration using JWT (JSON Web Tokens) to authenticate users and protect personal data.</li></ul>
<b>2. Favorite Teams and Players Selection:</b>	<ul style="list-style-type: none"><li>• Users can select up to five favorite teams and players across different sports and leagues.</li><li>• The homepage will display news, updates, and live scores for their favorites.</li><li>• Fetch and set to localStorage</li></ul>
<b>3. Live Scores and Updates:</b>	<ul style="list-style-type: none"><li>• Real-time scores and updates from multiple sports leagues (football, basketball, tennis, etc.).</li><li>• Push notifications for score changes, game starts, and key events.</li></ul>

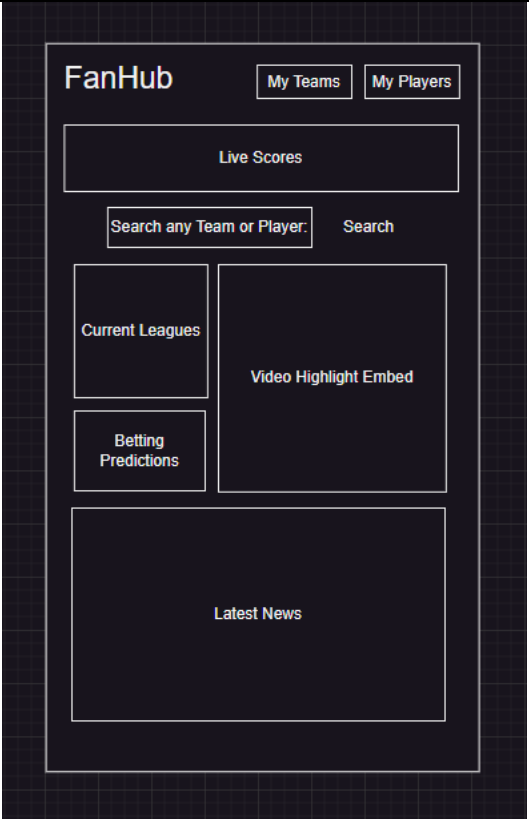

<b>4. Betting Odds and Predictions:</b>	<ul style="list-style-type: none"> <li>• Integration with betting platforms API to provide live odds for ongoing games.</li> <li>• Betting predictions based on statistics and expert analysis using API.</li> </ul>
<b>5. News and Video Highlights:</b>	<ul style="list-style-type: none"> <li>• Aggregation of news articles and video highlights from various sports sources.</li> <li>• Users can view top news and highlights for their favorite teams and players.</li> </ul>
<b>6. Social Media Access: (optional)</b>	<ul style="list-style-type: none"> <li>• Integrated access to social media feeds of favorite players and teams (e.g., Twitter, Instagram).</li> <li>• Fans can stay updated with social posts and interact directly from the app.</li> </ul>
<b>7. Dashboard and Personalization:</b>	<ul style="list-style-type: none"> <li>• A customizable dashboard that prioritizes content based on favorite teams/players.</li> <li>• Users can toggle between different views (e.g., news first, scores first, etc.). (optional)</li> </ul>

### Wireframes of Major Views:

#### 1. Mobile Wireframes (initial focus):

login.html	selection.html
------------	----------------

dashboard.html/index.html	
 A wireframe of a FanHub dashboard. The layout is contained within a dark grey rectangular area. At the top left is the 'FanHub' logo. To its right are two buttons: 'My Teams' and 'My Players'. Below the logo is a 'Live Scores' section. Underneath that is a search bar with the placeholder text 'Search any Team or Player:' and a 'Search' button. The main content area is divided into three sections: 'Current Leagues' on the left, 'Betting Predictions' below it, and a large 'Video Highlight Embed' area on the right. At the bottom is a 'Latest News' section.	

## 2. Desktop Wireframes:

### External API Data Sources:

1. Live Sports API (FlashLiveSports) for live scores and match updates.
2. Video Highlights (Free Football (Soccer) Videos API)
3. Betting Odds API (BetsAPI) for odds and betting data.
4. News and Highlights API (AllScoresAPI).

### Initial Module List:

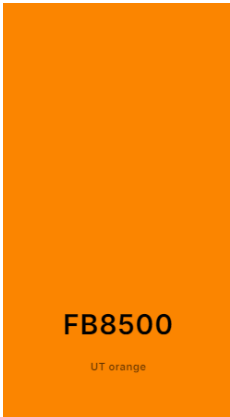

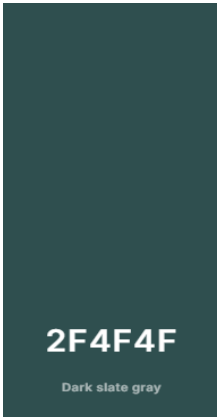

1. User Authentication Module:
  - User login/signup with JWT authentication, and secure storage.
2. Favorites Module:
  - Allows users to select and manage their favorite teams and players.
  - Uses local storage to persist user preferences.
3. Live Scores and Updates Module:
  - Fetch real-time scores and game updates from APIs.

- Display scorecards, video highlights, and player or team news.
4. Betting Odds and Prediction Module:
    - Fetch live betting odds for ongoing and upcoming games.
    - Display betting predictions based on stats.
  5. News and Video Highlights Module:
    - Aggregate sports news and highlights based on the user's favorites.
    - Display top video clips with smooth transitions.

## Colors/Typography/Specific Styling Elements:

### 1. Color Palette:

<b>Primary:</b> #023047 (Prussian Blue for action buttons and navigation).	<b>Secondary:</b> #FB8500 (UT Orange for notifications, odds, and highlights).	<b>Accent:</b> #2F4F4F (DarkSlateGray for background and secondary text).
		

### 2. Typography:

- **Primary Font:** Lato

```
<style>
@import
url('https://fonts.googleapis.com/css2?family=Lato:wght@400;700&
display=swap');
</style>
CSS:
.lato-regular {
font-family: "Lato", sans-serif;
font-weight: 400;
```

```
font-style: normal;  
}
```

```
.lato-bold {  
font-family: "Lato", sans-serif;  
font-weight: 700;  
font-style: normal;  
}
```

- **Secondary Font: Roboto**

```
<style>  
@import  
url('https://fonts.googleapis.com/css2?family=Lato:wght@400;700&  
family=Roboto:wght@400;500;700&display=swap');  
</style>
```

CSS:

```
.roboto-regular {  
font-family: "Roboto", sans-serif;  
font-weight: 400;  
font-style: normal;  
}
```

```
.roboto-medium {  
font-family: "Roboto", sans-serif;  
font-weight: 500;  
font-style: normal;  
}
```

```
.roboto-bold {  
font-family: "Roboto", sans-serif;  
font-weight: 700;  
font-style: normal;  
}
```

### 3. Specific Element Styling:

- Live Scores: Cards with animated score updates.
- Odds/Predictions: Highlighted sections with smooth transitions for changing odds.

### Schedule with Milestones:

1. Week 1: Finish Proposal, set up project structure, and research APIs.

2. Week 2: Build user authentication with JWT and favorite selection module.
3. Week 3: Implement live scores, updates, betting odds and predictions with Fetch API .
4. Week 4: Finish animation CSS and design bugs.
